Recycled Aggregates & Soils

Quality and Environmental Policy

Recycled in Orsett Limited is a fast growing company within the Aggregate Recycling Sector. We are committed to providing a first class service and as such recognise the duty of care required to our customers and the public.

We are continually reviewing procedures to ensure that we maintain a premier service this includes: -

- 1) Improving our operational and administration methods
- 2) Protecting the Environment by updating, developing and maintaining our systems

With the above two methods being continually updated this enables us to develop environmental systems that are increasingly compatible with the aims of the British and European Parliaments – adequate and effective resources are supporting these aims.

The Company policy of continual improvement is and will be achieved by the following: -

- Specific people are in charge of specific policies
- Introduction of systems to aid recycling and the environment
- All employees to gain a greater appreciation of recycling and the environment through training/regular communications
- To work with customers on their environmental needs
- To continually look for and encourage new sustainable markets for recycling
- To minimise the environmental impact of our transport operations
- We are committed to achieving a safe working environment
