Essex

TRAXMAX is manufactured from 100% recycled ceramics making it free draining, strong, durable, very hard wearing and resistant to degradation. When laid **TRAXMAX** is firm but yielding making it pleasant to walk or drive on.

TRAXMAX is easy to lay and work with. **TRAXMAX** is long lasting and does not degrade maintenance is carried out by simply raking the surface through to rejuvenate the **TRAXMAX**.

Versatile and aesthetically attractive **TRAXMAX** offers good colour contrasting when used alongside grass, brick, concrete, sand and wood. Supplied as a graded product with a maximum size of 8mm, **TRAXMAX** is consistent and produced to a high quality.

The long life and easy maintenance of **TRAXMAX** means reductions in time spent creating and maintaining footpaths and trackways. **TRAXMAX** can be re-used again and again therefore reducing money spent on materials and making **TRAXMAX** not only environmentally sustainable but extremely cost effective.
